

Is Your Forklift Battery Costing You More Than You Realize?

Reduced runtime ⚡ Slower lifts ⚡ Unexpected downtime ⚡ Expensive replacements

At Motive Power Systems, we help businesses maximize battery performance, reduce costly downtime, and extend battery life through expert sales, fast service, reliable repairs, and planned maintenance.

Common Signs Your Battery Needs Attention

- ✗ Reduced runs between charges
- ✗ Longer charging cycles
- ✗ Corroded terminals/cable damage
- ✗ Acid leaks or excessive buildup
- ✗ Weak lifting performance
- ✗ Batteries overheating during charging
- ✗ Frequent jump-starts/battery changes
- ✗ Unexpected forklift downtime

Ignoring these warning signs can lead to costly repairs, shortened battery life, lost productivity, and even safety concerns.

Power Your Fleet with **HAWKER** Batteries

As an authorized Hawker Powersource Partner, we offer industry-leading battery solutions designed to keep your operation moving.

- Flooded Lead-Acid Batteries
- Reliable, proven performance for demanding operations
- Thin Plate Pure Lead (TPPL) Batteries
- Fast charging, opportunity charging capabilities
- Lithium-Ion Battery Solutions
- Maximum uptime, rapid charging
- Virtually maintenance-free operation

Not sure which battery is right for your application? Our specialists can help you select the ideal solution based on your equipment, shifts, charging practices, and operational goals.
